Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics)
By Bo Lehnert, Sisir Roy

This book presents extended forms of the Maxwell equations as well as electromagnetic fields, based on a non-zero divergence of the electric field and a non-zero electric conductivity in vacuo. These approaches, which predict new features of the electromagnetic field, such as the existence of both longitudinal and transverse solutions, the existence of space-charge current in vacuo, and steady electromagnetic equilibria, have possible applications to charge and neutral leptons and new photon physics. The present theory can also clear up some unsolved problems, such as the total reflection of light at the interface between a vacuum and a dissipative medium, and the appearance of an angular momentum of the photon, thereby leading to a rest mass and an axial magnetic field component of the photon. This axial magnetic field component may be related to the B(3) field proposed by Evans and Vigier. A new gauge condition has been proposed to maintain consistency of the theory with the non-zero photon mass. Several consequences of the non-zero mass of the photon are also discussed, especially in the astrophysical context.

Editorial Review

Users Review

From reader reviews:

Amy Medina:

Hey guys, do you wishes to finds a new book to read? May be the book with the concept Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) suitable to you? Often the book was written by well-known writer in this era. The actual book untitled Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics)is the main one of several books this everyone read now. This particular book was inspired a lot of people in the world. When you read this e-book you will enter the new dimension that you ever know previous to. The author explained their thought in the simple way, therefore all of people can easily to recognise the core of this guide. This book will give you a great deal of information about this world now. In order to see the represented of the world within this book.

Mamie Perkins:

The actual book Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) has a lot info on it. So when you check out this book you can get a lot of gain. The book was published by the very famous author. The writer makes some research previous to write this book. This book very easy to read you can get the point easily after reading this book.

Rosemary Perez:

This Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) is brand-new way for you who has attention to look for some information given it relief your hunger associated with. Getting deeper you on it getting knowledge more you know otherwise you who still having small amount of digest in reading this Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) can be the light food for you because the information inside this book is easy to get simply by anyone. These books develop itself in the form which is reachable by anyone, yeah I mean in the e-book type. People who think that in e-book form make them feel tired even dizzy this guide is the answer. So there is absolutely no in reading a book especially this one. You can find actually looking for. It should be here for an individual. So , don't miss that! Just read this e-book kind for your better life and knowledge.

Melissa Cox:

With this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple method to have that. What you are related is just spending your time not much but quite enough to enjoy a look at some books. On the list of books in the top listing in your reading list is definitely Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics). This book that is certainly qualified as The Hungry Hillsides can get you closer in growing to be precious person. By looking upward and review this book you can get many advantages.
