Textbook of Midwifery and Reproductive Health Nursing By Basavanthappa

Nursing education is to ensure that students are fully prepared to meet the challenges of tomorrow. In the fast changing roles of health care professionals the competencies required for preparation of nurses and midwives pose a challenging task. This book fills the gap between material available and required to gain mastery over this subject as it extends beyond information of facts and skills. It addresses issues of both psychological and physiological needs of clients. The development of competence in the reproductive health nursing is one of the most important aspects of midwifery. This provides a holistic approach with the recognition that each individual is a unique patient. Each procedure contains rationale and information for patient education in addition to step-by-step guidance. Midwives and nurses play a significant role to promote health of women. It covers the course as per the Indian Nursing Council and Boards of education in different universities. SECTION 1: FOUNDATIONS OF MIDWIFERY AND REPRODUCTIVE HEALTH NURSING, 1. Significance of Nursing and Midwifery in India, 2. Anatomy and Physiology of Reproductive System, 3. Nursing Process Application, 4. Sexual Health and Nursing, 5.
