Pattern Recognition, Machine Intelligence and Biometrics From Springer

"Pattern Recognition, Machine Intelligence and Biometrics" covers the most recent developments in Pattern Recognition and its applications, using artificial intelligence technologies within an increasingly critical field. It covers topics such as: image analysis and fingerprint recognition; facial expressions and emotions; handwriting and signatures; iris recognition; hand-palm gestures; and multimodal based research. The applications span many fields, from engineering, scientific studies and experiments, to biomedical and diagnostic applications, to personal identification and homeland security. In addition, computer modeling and simulations of human behaviors are addressed in this collection of 31 chapters by top-ranked professionals from all over the world in the field of PR/AI/Biometrics.
The book is intended for researchers and graduate students in Computer and Information Science, and in Communication and Control Engineering.
Dr. Patrick S. P. Wang is a Professor Emeritus at the College of Computer and Information Science, Northeastern University, USA, Zijiang Chair of ECNU, Shanghai, and NSC Visiting Chair Professor of NTUST, Taipei.

Editorial Review

Review

From the reviews:

“This book is a collection of 31 scientific papers organized in four main sections: ‘Pattern recognition and Machine Intelligence’, ‘Computer Vision and Image Processing’, ‘Face Recognition and Forensics’ and ‘Biometrics Authentication’. These chapters cover a broad domain making the book appealing to a large group of specialists.” (Leon Todoran, IAPR Newsletter, Vol. 34 (4), October, 2012)

Users Review

From reader reviews:

Patricia Rodrigue:

As people who live in often the modest era should be change about what going on or info even knowledge to make them keep up with the era that is certainly always change and make progress. Some of you maybe will probably update themselves by examining books. It is a good choice to suit your needs but the problems coming to you actually is you don't know what type you should start with. This Pattern Recognition, Machine Intelligence and Biometrics is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

Edna Spalding:

The knowledge that you get from Pattern Recognition, Machine Intelligence and Biometrics will be the more deep you digging the information that hide into the words the more you get serious about reading it. It does not mean that this book is hard to recognise but Pattern Recognition, Machine Intelligence and Biometrics giving you joy feeling of reading. The author conveys their point in a number of way that can be understood simply by anyone who read the item because the author of this publication is well-known enough. This book also makes your vocabulary increase well. Therefore it is easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having this particular Pattern Recognition, Machine Intelligence and Biometrics instantly.

Mary Moore:

The e-book untitled Pattern Recognition, Machine Intelligence and Biometrics is the book that recommended to you to read. You can see the quality of the publication content that will be shown to an individual. The language that writer use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, to ensure the information that they share to you is absolutely accurate. You also could possibly get the e-book of Pattern Recognition, Machine Intelligence and Biometrics from the publisher to make you considerably more enjoy free time.

Mary Brown:

The publication with title Pattern Recognition, Machine Intelligence and Biometrics posesses a lot of information that you can discover it. You can get a lot of advantage after read this book. This particular book exist new knowledge the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you with new era of the the positive effect. You can read the e-book in your smart phone, so you can read it anywhere you want.
