Editorial Review

Review
I have a small, jealously guarded library of best-ever food gardening books, most of them now out of print, and all authored by gardeners who spent at least as much time growing food as writing. So when one of these classics comes back into print, I m excited. The New Self-Sufficient Gardener by John Seymour is the latest case in point... A fan of deep-bed gardening, his book shows how to get the most out of small amounts of land. All these principles work as well on a hundred-square-foot city garden as on a farm... The result is a book that's loaded with large, engaging color illustrations of fruits, vegetables, composting, whole gardens, greenhouses, chicken coops, trellising, beekeeping, pruning, grafting, and just about every other food-growing activity you can think of. --Sunset Magazine
