Cyberspace and National Security: Threats, Opportunities, and Power in a Virtual World From Georgetown University Press

In a very short time, individuals and companies have harnessed cyberspace to create new industries, a vibrant social space, and a new economic sphere that are intertwined with our everyday lives. At the same time, individuals, subnational groups, and governments are using cyberspace to advance interests through malicious activity. Terrorists recruit, train, and target through the Internet, hackers steal data, and intelligence services conduct espionage. Still, the vast majority of cyberspace is civilian space used by individuals, businesses, and governments for legitimate purposes.

Cyberspace and National Security brings together scholars, policy analysts, and information technology executives to examine current and future threats to cyberspace. They discuss various approaches to advance and defend national interests, contrast the US approach with European, Russian, and Chinese approaches, and offer new ways and means to defend interests in cyberspace and develop offensive capabilities to compete there. Policymakers and strategists will find this book to be an invaluable resource in their efforts to ensure national security and answer concerns about future cyberwarfare.

Editorial Review

Review
"Derek Reveron's editing deserves specific and laudatory mention. Rather than merely a collection of articles arranged by topic, he has produced a broad web of writings that shows the interaction of varied scholarly efforts, makes few restatements of the same facts, and brings the volume as a whole to bear on a variety of subtopics."

--BRETT J. PATRON, Naval War College Review, Winter 2013

"Overall, Reveron et al. provide us with an intelligent and well-informed analysis of contemporary cyber security issues. This is a book by the national security community for the national security community."?*Contemporary Security Policy*

Review

"*Cyberspace and National Security* makes an impressive contribution to cyber scholarship with essays from leading academics and practitioners. Some essays survey the landscape in novel ways and others break new ground and provide excellent reading whether you are new to cyber statecraft issues or a long-time veteran."?Jason Healey, director, Cyber Statecraft Initiative of the Atlantic Council and former policy director for cybersecurity at the White House

About the Author
Derek S. Reveron is a professor of national security affairs and the EMC Informationist Chair at the US Naval War College. He is the author of *Exporting Security: International Engagement, Security Cooperation, and the Changing Face of the US Military* and coauthor of *Human Security in a Borderless World*.

Users Review

From reader reviews:

James Stover:

Have you spare time for the day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the Mall. How about open as well as read a book titled Cyberspace and National Security: Threats, Opportunities, and Power in a Virtual World? Maybe it is being best activity for you. You know beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it is opinion or you have additional opinion?

Velma Stuart:

Information is provisions for those to get better life, information presently can get by anyone on everywhere. The information can be a understanding or any news even restricted. What people must be consider whenever those information which is inside the former life are challenging be find than now could be taking seriously which one would work to believe or which one often the resource are convinced. If you receive the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen within you if you take Cyberspace and National Security: Threats, Opportunities, and Power in a Virtual World as the daily resource information.

Fred Polak:

Reading a book to become new life style in this calendar year; every people loves to study a book. When you learn a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and soon. The Cyberspace and National Security: Threats, Opportunities, and Power in a Virtual World provide you with new experience in studying a book.

Marcia Ogburn:

That guide can make you to feel relax. That book Cyberspace and National Security: Threats, Opportunities, and Power in a Virtual World was multi-colored and of course has pictures on there. As we know that book Cyberspace and National Security: Threats, Opportunities, and Power in a Virtual World has many kinds or variety. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and think you are the character on there. So , not at all of book tend to be make you bored, any it offers you feel happy, fun and relax. Try to choose the best book in your case and try to like reading that.
