Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization By Muthu Ramachandran, Rogerio Atem de Carvalho

Global software development and productivity related technologies are the key to today's globalization with new technologies and concepts being developed continually. In such an ever-evolving environment, teachers, researchers, and professionals in the discipline need access to the most current information about the concepts, issues, trends, and technologies in this emerging field. **The Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization** provides an authoritative collection of international research on software engineering and enterprise systems. Presenting unique coverage of topics such as agile software engineering, requirements traceability, and distributed software development, this Handbook of Research offers an innovative repository of knowledge useful to academicians, practitioners, and researchers in various related fields.

Editorial Review

About the Author
Muthu Ramachandran is currently a principal lecturer in the Faculty of Innovation North: Information and Technology, Leeds Metropolitan University (Leeds, UK). Previously he spent nearly eight years in industrial research (Philips Research Labs and Volantis Systems Ltd, Surrey, UK) where he worked on software architecture, reuse, and testing. Prior to that he was teaching at Liverpool John Moores University and received his PhD from Lancaster University. His career started as a research scientist for India Space Research Labs where he worked on real time systems development projects. Muthu has widely published articles in journals, books, and conferences on various advanced topics on software engineering and education. He completed his master's degrees from Indian Institute of Technology, Madras and from Madurai Kamaraj University (Madurai, India). Muthu is also a member of various professional organizations and computer societies including IEEE, ACM, BCS, HEA.

Rogerio Atem de Carvalho is a teacher, researcher, and innovation coordinator with the Instituto Federal Fluminense (IFF), Brazil, and a Brazilian representative at both IFIP Working Group and IEEE SMC Society Technical Committee on Enterprise Information Systems. He holds a BSc in computer science and a DSc in industrial engineering, his technical interests and publishing areas are free software, ERP, ECM, project management, and decision support systems.

Users Review

From reader reviews:

William Medellin:

As people who live in the particular modest era should be change about what going on or facts even knowledge to make them keep up with the era that is certainly always change and make progress. Some of you maybe will probably update themselves by looking at books. It is a good choice in your case but the problems coming to a person is you don't know what type you should start with. This Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

Kathleen Owen:

This Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization are reliable for you who want to be a successful person, why. The main reason of this Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization can be one of several great books you must have is actually giving you more than just simple reading through food but feed a person with information that probably will shock your prior knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed people. Beside that this Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization giving you an enormous of experience such as rich vocabulary, giving you test of critical thinking that we understand it useful in your day action. So , let's have it appreciate

reading.

Jeannette Villalobos:

Do you have something that you want such as book? The book lovers usually prefer to choose book like comic, quick story and the biggest the first is novel. Now, why not trying Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization that give your pleasure preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the method for people to know world far better then how they react when it comes to the world. It can't be mentioned constantly that reading practice only for the geeky individual but for all of you who wants to possibly be success person. So , for all you who want to start looking at as your good habit, it is possible to pick Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization become your starter.

Charlotte Neville:

Many people spending their period by playing outside together with friends, fun activity using family or just watching TV all day every day. You can have new activity to invest your whole day by reading through a book. Ugh, think reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Touch screen phone. Like Handbook of Research on Software Engineering and Productivity Technologies: Implications of Globalization which is obtaining the e-book version. So , why not try out this book? Let's observe.
