101 Puzzles in Thought and Logic (Dover Recreational Math) By C. R. Wylie Jr.

Do you like puzzles based on logic and reasoning? Try this one:
In a certain bank the position of cashier, manager, and teller are held by Brown, Jones, and Smith, though not necessarily in that order. The teller, who was an only child, earns the least. Smith, who married Brown's sister, earns more than the manager. What position does each man fill?
If you like to entertain yourself and stretch mental muscles on problems like this or more difficult ones, here are 101 entirely new problems for which you need no special knowledge, no mathematical training—simply the ability to reason clearly.
Follow these problems through and you will not only increase your ability to think in abstractions, but you will enjoy solving murder problems and robberies, see which fishermen are liars and how a blind man can identify color purely by logic, and enjoy dozens of interesting situations. Puzzles range from easy to relatively difficult, and will please both beginners and experts.

Editorial Review

About the Author

The late C. R. Wylie, Jr., taught for many years at the University of Utah, where he was Chairman of the Department of Mathematics.

A Dover Original
Clarence Raymond Wylie, Jr., had a long career as a writer of mathematics and engineering textbooks. His *Advanced Engineering Mathematics* was the standard text in that field starting in the 1950s and for many decades thereafter. He also wrote widely used textbooks on geometry directed at students preparing to become secondary school teachers, which also serve as very useful reviews for college undergraduates even today. Dover reprinted two of these books in recent years, *Introduction to Projective Geometry* in 2008 and *Foundations of Geometry* in 2009.

The author is important to our program for another reason as well. In 1957, when Dover was publishing very few original books of any kind, we published Wylie's original manuscript *101 Puzzles in Thought and Logic*. The book is still going strong after 55 years, and the gap between its first appearance in 1957 and *Introduction to Projective Geometry* in 2008 may be the longest period of time between the publication of two books by the same author in the history of the Dover mathematics program. Wylie's 1957 book launched the Dover category of intriguing logic puzzles, which has seen the appearance of many books by some of the most popular authors in the field including Martin Gardner and, more recently, Raymond Smullyan.

Here's a quick one from *101 Puzzles in Thought and Logic:*

If it takes twice as long for a passenger train to pass a freight train after it first overtakes it as it takes the two trains to pass when going in opposite directions, how many times faster than the freight train is the passenger train?

Answer: The passenger train is three times as fast as the freight train.

Users Review

From reader reviews:

Lawrence Seay:

The book 101 Puzzles in Thought and Logic (Dover Recreational Math) can give more knowledge and information about everything you want. Why must we leave the best thing like a book 101 Puzzles in Thought and Logic (Dover Recreational Math)? Wide variety you have a different opinion about guide. But one aim in which book can give many information for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or details that you take for that, it is possible to give for each other; you could share all of these. Book 101 Puzzles in Thought and Logic (Dover Recreational Math) has simple shape

however you know: it has great and massive function for you. You can search the enormous world by open and read a book. So it is very wonderful.

Terri Brown:

As people who live in often the modest era should be up-date about what going on or information even knowledge to make all of them keep up with the era that is certainly always change and move forward. Some of you maybe will probably update themselves by examining books. It is a good choice for yourself but the problems coming to you is you don't know what type you should start with. This 101 Puzzles in Thought and Logic (Dover Recreational Math) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and wish in this era.

Randy Caldera:

Hey guys, do you desires to finds a new book to see? May be the book with the concept 101 Puzzles in Thought and Logic (Dover Recreational Math) suitable to you? Often the book was written by well known writer in this era. Often the book untitled 101 Puzzles in Thought and Logic (Dover Recreational Math)is the main one of several books in which everyone read now. This book was inspired many people in the world. When you read this guide you will enter the new age that you ever know previous to. The author explained their strategy in the simple way, so all of people can easily to comprehend the core of this reserve. This book will give you a great deal of information about this world now. To help you to see the represented of the world in this book.

Thomas Mitchell:

In this period globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. Often the book that recommended to you is 101 Puzzles in Thought and Logic (Dover Recreational Math) this book consist a lot of the information of the condition of this world now. This book was represented how can the world has grown up. The language styles that writer make usage of to explain it is easy to understand. Typically the writer made some study when he makes this book. That is why this book acceptable all of you.
