50 Studies Every Doctor Should Know: The Key Studies that Form the Foundation of Evidence Based Medicine (Fifty Studies Every Doctor Should Know) By Michael E. Hochman

50 Studies Every Doctor Should Know presents key studies that have shaped the practice of medicine. Selected using a rigorous methodology, the studies cover topics ranging from dieting to cardiovascular disease, insomnia to obstetrics. For each study, a concise summary is presented with an emphasis on the results and limitations of the study, and its implications for practice. Brief information on other relevant studies is provided, and an illustrative clinical case concludes each review. A section of review questions and answers is included at the back of the book to ensure that readers take away the key messages from each study. This book is a must-read for health care professionals and anyone who wants to learn more about the data behind clinical practice.

Editorial Review

Review

Voted the February Book of the Month by the *Informed Medical Decisions Foundation*

"This is a highly valuable starting point for medical students and those in residency training, but the book is also useful for anyone interested in evidence-based medical practice and for policymakers who need a starting point to understand current medical decision-making. ... What makes this book extraordinary are the summaries of the studies followed by the implications for medical practice. This is a most important summarization for every clinician in practice..." 5 Stars --*Vincent F Carr, DO, MSA, FACC, FACP (Uniformed Services University of the Health Sciences), Doody's Health Sciences Book Review*

About the Author

Medical Director for Innovation, AltaMed Health Services and Robert Wood Johnson Foundation Clinical Scholar, Department of Internal Medicine, University of California, Los Angeles.

Users Review

From reader reviews:

Michelle Carlson:
