Behavioural Methods in Consciousness Research From Oxford University Press

The past two decades have seen a surge of interest in the topic of consciousness, with the result that the research literature has expanded greatly. However, until now, there has been little consensus on just which methods are the most effective for the study of consciousness. As a result, a wide range of experimental paradigms have been employed, sometimes making it different to compare and contrast experimental findings.

'Behavioural methods in consciousness research' is the first book of its kind, providing an overview of methods and approaches for studying consciousness. The chapters are written by leading researchers and experts, who describe the methods they actually use in their own studies, along with their pitfalls, problems, and difficulties.

For all students and researchers embarking on research in this area - and even seasoned researchers - this book is a valuable source of information in helping them design, perform, and analyse scientifically rigorous experiments.

Editorial Review

About the Author

Morten Overgaard, *Professor of Cognitive Neuroscience and Professor of Neuropsychology, Aarhus University and Aalborg University*

Morten Overgaard is Professor of Cognitive Neuroscience at Aarhus University and of Neuropsychology at Aalborg University. He started his career developing his own research group (Cognitive Neuroscience Research Unit/CNRU) and his own approach to studying and thinking about consciousness. He has headed several national and international research projects, integrating aspects of neuroscience, psychology and philosophy in order to answer a variety of questions in basic research and clinical practice. His primary focus is however what is considered to be the perhaps most challenging research question in history: Why are we conscious? How can it be that physical processes in the brain seem to be accompanied with subjective experience?

Users Review

From reader reviews:

Terry Hayes:

Reading a reserve tends to be new life style in this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Together with book everyone in this world can certainly share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their reader with their story or perhaps their experience. Not only the storyline that share in the guides. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors nowadays always try to improve their talent in writing, they also doing some exploration before they write on their book. One of them is this Behavioural Methods in Consciousness Research.

Leticia Brewster:

Reading can called mind hangout, why? Because if you find yourself reading a book mainly book entitled Behavioural Methods in Consciousness Research the mind will drift away trough every dimension, wandering in most aspect that maybe unfamiliar for but surely will become your mind friends. Imaging just about every word written in a guide then become one type conclusion and explanation in which maybe you never get ahead of. The Behavioural Methods in Consciousness Research giving you a different experience more than blown away your mind but also giving you useful info for your better life within this era. So now let us demonstrate the relaxing pattern is your body and mind will likely be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

Norma Lorentzen:

This Behavioural Methods in Consciousness Research is great e-book for you because the content which is full of information for you who all always deal with world and also have to make decision every minute. This book reveal it information accurately using great manage word or we can claim no rambling sentences inside. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but tricky core information with splendid delivering sentences. Having Behavioural Methods in Consciousness Research in your hand like getting the world in your arm, information in it is not ridiculous a single. We can say that no e-book that offer you world inside ten or fifteen minute right but this e-book already do that. So , this can be good reading book. Hey Mr. and Mrs. stressful do you still doubt this?

Vincent Humphreys:

That reserve can make you to feel relax. This specific book Behavioural Methods in Consciousness Research was colorful and of course has pictures around. As we know that book Behavioural Methods in Consciousness Research has many kinds or variety. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book to suit your needs and try to like reading that will.
