Cost Management: Measuring, Monitoring, and Motivating Performance (Management Accounting) By Leslie G. Eldenburg, Susan Wolcott

Cost Management" was written in response to changes in the global business environment. Unbridled access to information and intense competition has meant that cost accounting has become an increasingly important tool for managers and accountants alike. Most textbooks focus on content knowledge and then expect students to 'magically' demonstrate skills such as decision-making and critical thinking. "Cost Management" better prepares students for professional success by bridging the gaps between Knowledge, Skills and Abilities. Many students fail to recognize the assumptions, limitations, behavioral implications and qualitative factors that influence managerial decision-making. The dynamic, new author team focuses on cost accounting methods, techniques and the quality of cost accounting information used for decision-making to deliver a thoroughly modern treatment of cost accounting topics.

Editorial Review

From the Back Cover
"Cost Management" was written in response to changes in the global business environment. Unbridled access to information and intense competition has meant that cost accounting has become an increasingly important tool for managers and accountants alike. Most textbooks focus on content knowledge and then expect students to 'magically' demonstrate skills such as decision-making and critical thinking. "Cost Management" better prepares students for professional success by bridging the gaps between Knowledge, Skills and Abilities.

Many students fail to recognize the assumptions, limitations, behavioral implications and qualitative factors that influence managerial decision-making. The dynamic, new author team focuses on cost accounting methods, techniques and the quality of cost accounting information used for decision-making to deliver a thoroughly modern treatment of cost accounting topics.

The textbook is written in a style that is accessible to students and proactive about addressing the challenges that instructors and students face in their teaching and learning endeavors by utilizing features such as a decision-making framework, realistic examples, guide your learning boxes, real ethical dilemmas, self-study problems and unique problem material structured to encourage students to think about accounting problems and problem-solving more complexly.

About the Author
Leslie G. Eldenburg, PhD, is a McCoy-Rogers Fellow at the University of Arizona. She has also taught at California State University-Fresno. She received her MBA and PhD from the University of Washington. She passed the CPA exam in 1985 and has taught review courses for the CMA exam.
