Design of FRP and Steel Plated RC Structures: Retrofitting Beams and Slabs for Strength, Stiffness and Ductility By Deric Oehlers, Rudolph Seracino

There are a large and ever-increasing number of structures and buildings worldwide that are in need of refurbishment, rehabilitation and strengthening. The retrofitting of beams and slabs for this purpose is now recognized as the most cost-effective and environmentally sustainable method of carrying out this essential renovation work.

The authors of *Design of FRP and Steel Plated RC Structures* are both acknowledged world experts on these techniques and their book has been designed to provide the reader with a comprehensive overview of the established techniques and their applications as well as thorough coverage of newly emerging methodologies and their uses. The comparison of FRP and steel is a particular focus and the authors provide practical examples of where one material might be used in preference to another. Indeed practical, worked examples of how, when, and why specific solutions have been chosen in real-world situations are used throughout the text and provide the user with invaluable insights into the decision-making process and its technical background. Just as importantly these examples make the understanding and application of these techniques easier to understand for the student and the practitioner. The book is international in appeal, as while no reference is made to specific local codes the authors' approach always follows that of the more advanced structural codes worldwide. As such it will remain an essential resource for many years to come.

Design of FRP and Steel Plated RC Structures is an important reference for a broad range of researchers, students and practitioners including civil engineers and contractors, architects, designers and builders.

- Contains detailed worked examples throughout to aid understanding and provide technical insight
- Covers all types of metal plates and all types of FRP plates
- Uses design philosophies that can be used with any mathematical model
- Provides coverage of all main international guidelines

Editorial Review

Users Review

From reader reviews:

William Chapman:

Within other case, little people like to read book Design of FRP and Steel Plated RC Structures: Retrofitting Beams and Slabs for Strength, Stiffness and Ductility. You can choose the best book if you love reading a book. Given that we know about how is important a new book Design of FRP and Steel Plated RC Structures: Retrofitting Beams and Slabs for Strength, Stiffness and Ductility. You can add understanding and of course you can around the world by way of a book. Absolutely right, because from book you can know everything! From your country right up until foreign or abroad you will end up known. About simple factor until wonderful thing you are able to know that. In this era, we could open a book or even searching by internet system. It is called e-book. You should use it when you feel bored to go to the library. Let's learn.

Hollie Hoffman:

Book is usually written, printed, or descriptive for everything. You can recognize everything you want by a reserve. Book has a different type. We all know that that book is important issue to bring us around the world. Beside that you can your reading proficiency was fluently. A book Design of FRP and Steel Plated RC Structures: Retrofitting Beams and Slabs for Strength, Stiffness and Ductility will make you to become smarter. You can feel much more confidence if you can know about everything. But some of you think which open or reading a book make you bored. It's not make you fun. Why they might be thought like that? Have you looking for best book or appropriate book with you?

Barbara Lewis:

Now a day people who Living in the era wherever everything reachable by connect with the internet and the resources within it can be true or not involve people to be aware of each details they get. How a lot more to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Reading a book can help people out of this uncertainty Information especially this Design of FRP and Steel Plated RC Structures: Retrofitting Beams and Slabs for Strength, Stiffness and Ductility book as this book offers you rich information and knowledge. Of course the details in this book hundred % guarantees there is no doubt in it you probably know this.

Sally McGarvey:

Reading a guide can be one of a lot of exercise that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new

data. When you read a guide you will get new information since book is one of various ways to share the information or their idea. Second, studying a book will make anyone more imaginative. When you looking at a book especially hype book the author will bring you to imagine the story how the people do it anything. Third, you may share your knowledge to other people. When you read this Design of FRP and Steel Plated RC Structures: Retrofitting Beams and Slabs for Strength, Stiffness and Ductility, it is possible to tells your family, friends as well as soon about yours guide. Your knowledge can inspire average, make them reading a guide.
