Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices By Max Ray-Riek

How can we break the cycle of frustrated students who "drop out of math" because the procedures just don't make sense to them? Or who memorize the procedures for the test but don't really understand the mathematics? Max Ray-Riek and his colleagues at the Math Forum @ Drexel University say "problem solved," by offering their collective wisdom about how students become proficient problem solvers, through the lens of the CCSS for Mathematical Practices. They unpack the process of problem solving in fresh new ways and turn the Practices into activities that teachers can use to foster habits of mind required by the Common Core:

- communicating ideas and listening to the reflections of others
- estimating and reasoning to see the "big picture" of a problem
- organizing information to promote problem solving
- using modeling and representations to visualize abstract concepts
- reflecting on, revising, justifying, and extending the work.

Powerful Problem Solving shows what's possible when students become active doers rather than passive consumers of mathematics. Max argues that the process of sense-making truly begins when we create questioning, curious classrooms full of students' own thoughts and ideas. By asking "What do you notice? What do you wonder?" we give students opportunities to see problems in big-picture ways, and discover multiple strategies for tackling a problem. Self-confidence, reflective skills, and engagement soar, and students discover that the goal is not to be "over and done," but to realize the many different ways to approach problems.

Editorial Review

Review
Max Ray and his Math Forum colleagues have crafted a powerful guide to bringing the Standards for Mathematics Practice to life in our classrooms. Packed with real classroom experiences and easy-to-adopt activities, this book will help every teacher of mathematics overcome the instructional obstacles we face when trying to engage students in problem solving, reasoning and communication. --Steven Leinwand, American Institutes for Research and author of Accessible Mathematics

Powerful Problem Solving Activities draws attention to a greater understanding of how to integrate the Standards for Mathematical Practice into daily teaching to ensure that students develop critical thinking and problem solving skills. Helpful features in this book include learning through listening, noticing and wondering, seeing the big picture, engaging student s number sense through guessing, looking for structure, abstracting and modeling. This book is every teacher s roadmap for the development of mathematically proficient problem solvers. Teachers who read and spend time with this book will strengthen their own problem solving abilities and content knowledge and find confidence in their ability to think and reason. --Suzanne Mitchell, past president, NCTM

About the Author
Max Ray-Riek is a Professional Collaboration Facilitator at the Math Forum@ Drexel, a leading online resource for improving math learning, teaching, and communication. He is a former secondary mathematics teacher who presents at national conferences on fostering problem solving, communication, and valuing student thinking.

Users Review

From reader reviews:

Bernice Martinez:

What do you concentrate on book? It is just for students because they are still students or the idea for all people in the world, what the best subject for that? Merely you can be answered for that query above. Every person has several personality and hobby for every other. Don't to be compelled someone or something that they don't wish do that. You must know how great in addition to important the book Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices. All type of book are you able to see on many solutions. You can look for the internet methods or other social media.

Dwight Roberts:

This Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices book is simply not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is definitely information inside this reserve incredible fresh, you will get details which is getting deeper you actually read a lot of information you will get. This kind of Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices without we understand teach the one who reading it become critical in thinking and analyzing. Don't become worry Powerful Problem Solving: Activities for Sense Making with

the Mathematical Practices can bring when you are and not make your carrier space or bookshelves' grow to be full because you can have it in your lovely laptop even mobile phone. This Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices having very good arrangement in word and layout, so you will not really feel uninterested in reading.

Chad Davis:

Your reading 6th sense will not betray an individual, why because this Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices reserve written by well-known writer who knows well how to make book which can be understand by anyone who all read the book. Written in good manner for you, dripping every ideas and composing skill only for eliminate your personal hunger then you still uncertainty Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices as good book not just by the cover but also by content. This is one e-book that can break don't judge book by its handle, so do you still needing one more sixth sense to pick this kind of!? Oh come on your examining sixth sense already alerted you so why you have to listening to another sixth sense.

Nicolas Dandrea:

This Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices is great publication for you because the content and that is full of information for you who else always deal with world and get to make decision every minute. This kind of book reveal it details accurately using great coordinate word or we can declare no rambling sentences in it. So if you are read the item hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but tricky core information with beautiful delivering sentences. Having Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices in your hand like keeping the world in your arm, details in it is not ridiculous a single. We can say that no guide that offer you world with ten or fifteen second right but this publication already do that. So , it is good reading book. Hello Mr. and Mrs. active do you still doubt in which?
