Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards By Morton Lippmann, Beverly S. Cohen, Richard B. Schlesinger

This is a broad, in-depth introduction to a scientific field that is becoming ever more central to human health. Environmental exposures to a bewildering array of chemical and physical agents result from our individual and collective activities, and can cause effects ranging from discomfort through loss of function, illness, chronic diseases, and premature death. Their concomitant effects on quality of life, productivity, and need for clinical services can be costly. The book covers the terminology used in environmental health; the sources of chemical and physical agents in the environment; how they disperse and transform throughout the environment; their effects on environmental quality and human health; how levels and exposures are quantified; how standards are established; how levels, exposures, and risks can be controlled; and what technological opportunities and trends are likely to influence our environmental future. It includes chapters on noise, ionizing radiation, non-ionizing radiation, risk assessment, and risk management. Written in a clear and systematic way, this text will be an invaluable resource for students of environmental health.

An earlier version of the book, *Chemical Contamination in the Human Environment* (OUP 1979), was called by one teacher "visionary...easily the most useful textbook in environmental health science for entry-level graduate students."

Editorial Review

About the Author
Morton Lippmann is at New York University. Beverly S. Cohen is at NYU-EPA Pm Center, New York School of Medicine.

Users Review

From reader reviews:

Holly Silva:

In this 21st millennium, people become competitive in each and every way. By being competitive now, people have do something to make them survives, being in the middle of the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Sure, by reading a guide your ability to survive enhance then having chance to remain than other is high. In your case who want to start reading some sort of book, we give you this Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards book as basic and daily reading book. Why, because this book is greater than just a book.

Samuel Salamanca:

As people who live in the actual modest era should be update about what going on or information even knowledge to make these people keep up with the era which is always change and move ahead. Some of you maybe will update themselves by reading books. It is a good choice for yourself but the problems coming to anyone is you don't know what kind you should start with. This Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards is our recommendation to make you keep up with the world. Why, because book serves what you want and need in this era.

Christopher Ray:

With this era which is the greater person or who has ability to do something more are more precious than other. Do you want to become one among it? It is just simple solution to have that. What you need to do is just spending your time little but quite enough to have a look at some books. One of several books in the top listing in your reading list is usually Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards. This book that is certainly qualified as The Hungry Hills can get you closer in getting precious person. By looking right up and review this publication you can get many advantages.

Jeffrey Ramsey:

As we know that book is essential thing to add our understanding for everything. By a reserve we can know everything you want. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This e-book Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards was filled in relation to science. Spend your extra time to add your knowledge about your research competence. Some people has various feel when they reading any book. If you know how big advantage of a book, you can really feel enjoy to read a book. In the modern era like at this point, many ways to get book you wanted.
