Editorial Review

From School Library Journal
Gr 4-7-Filled with fascinating facts and photos, these information-packed volumes take on familiar and little-known catastrophes. While the details of these natural and human-made disasters will intrigue readers, the true focus of the books is how scientists employ the scientific method to improve past ideas and theories and potentially avoid future tragedies. Charts, diagrams, and illustrations will help readers better understand the scientific concepts presented, and thought-provoking sidebars pose questions for further contemplation and investigation. The inclusion of the "Top 5" at the end of each volume provides some sobering statistics; however, the criteria for these assertions are unclear. For the most part, the authors are experts in their respective fields, giving the text greater credibility, but the lack of citations is noticeable and troubling. Solid offerings, despite these flaws.α(c) Copyright 2014. Library Journals LLC, a wholly owned subsidiary of Media Source, Inc. No redistribution permitted.

Users Review

From reader reviews:

Joshua Orvis:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each publication has different aim or maybe goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They may be reading whatever they acquire because their hobby is definitely reading a book. How about the person who don't like studying a book? Sometime, man or woman feel need book if they found difficult problem or exercise. Well, probably you will want this The Science of a Plane Crash (21st Century Skills Library: Disaster Science).

Shirley Demers:
