Waste Management: A Reference Handbook (Contemporary World Issues)
By Jacqueline Vaughn

An authoritative review of issues in waste management both in the United States and globally that measures the scope of the problem and examines the latest scientific and policy initiatives for addressing it.

• A separate chapter of primary source documents relevant to the issue of waste management, including presidential speeches, industry statistics, and international agreements

• A chronology ranging from 1757 and the first municipal trash cleaning service to the ban on the production, sale, and use of plastic bags in China in 2008

Editorial Review

Review
"Drawing from history, political science, environmental science, engineering, sociology, and public health literature, Vaughn (political science, Northern Arizona U.) presents an introductory overview of waste and waste management, suitable for high school and college students, scholars, and general readers, as well as legislators, businesspeople, and activists." - **SciTech Book News**

"… a complete and comprehensive introduction to contemporary waste management issues and features a chronology of thematically relevant events, legislation, and movements;… An ideal textbook for Environmental Studies curriculums, *Waste Management* is also very highly recommended reading for environmental activists and non-specialist general readers with an interest in waste management issues." - **Midwest Book Review**

"The book in its present form is appropriate only for general readers and those just developing an interest in and knowledge of waste management. It may not provide necessary technical information for professional practitioners and advanced students." - **Choice**

"The environmental movement and concern over hazardous waste and overfilled landfills make this a useful introductory reference. The section on background issues is insightful and the pages devoted to the broader concept of waste management establish perspective for the rest of the book. The section on controversies and solutions is useful, addressing such issues as 'Paper or Plastic?' and 'Technological Advances.' Although not a glamorous topic, this title is timely and will be of importance for those researching environmental issues and how best to deal with them. It should find a home in any school or public library." - **ARBA**

About the Author

Jacqueline Vaughn, Ph.D., is professor of political science at Northern Arizona University, Flagstaff, AZ. Her published works include ABC-CLIO's *Conflicts over Natural Resources: A Reference Handbook.*

Users Review

From reader reviews:

Lois Yale:
