Foundations of Security: What Every Programmer Needs to Know (Expert's Voice) By Christoph Kern, Anita Kesavan, Neil Daswani

Software developers need to worry about security as never before. They need clear guidance on safe coding practices, and that’s exactly what this book delivers. The book does not delve deep into theory, or rant about the politics of security. Instead, it clearly and simply lays out the most common threats that programmers need to defend against. It then shows programmers how to make their defense. The book takes a broad focus, ranging over SQL injection, worms and buffer overflows, password security, and more. It sets programmers on the path towards successfully defending against the entire gamut of security threats that they might face.

Editorial Review

Review

From the reviews:

"It is written based on a course for beginning programmers. … The book has three main parts: security design principles, secure programming techniques, and an introduction to cryptography. … Exercises are included at the end of each part in order to provide suggestions for getting hands-on experience." (A. Mariën, ACM Computing Reviews, Vol. 49 (5), May, 2008)

About the Author
Christoph Kern is an information security engineer at Google and was previously a senior security architect at Yodlee, a provider of technology solutions to the financial services industry. He has extensive experience in performing security design reviews and code audits, designing and developing secure applications, and helping product managers and software engineers effectively mitigate security risks in their software products.

Users Review

From reader reviews:

Efrain Floyd:

Throughout other case, little individuals like to read book Foundations of Security: What Every Programmer Needs to Know (Expert's Voice). You can choose the best book if you'd prefer reading a book. So long as we know about how is important any book Foundations of Security: What Every Programmer Needs to Know (Expert's Voice). You can add knowledge and of course you can around the world by just a book. Absolutely right, mainly because from book you can realize everything! From your country until eventually foreign or abroad you will be known. About simple matter until wonderful thing you could know that. In this era, you can open a book as well as searching by internet unit. It is called e-book. You should use it when you feel uninterested to go to the library. Let's go through.

Shirley Dildy:

Foundations of Security: What Every Programmer Needs to Know (Expert's Voice) can be one of your beginning books that are good idea. We all recommend that straight away because this e-book has good vocabulary which could increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort that will put every word into satisfaction arrangement in writing Foundations of Security: What Every Programmer Needs to Know (Expert's Voice) yet doesn't forget the main position, giving the reader the hottest along with based confirm resource information that maybe you can be certainly one of it. This great information could drawn you into fresh stage of crucial imagining.

Dustin Singh:

Don't be worry should you be afraid that this book may filled the space in your house, you can have it in e-book method, more simple and reachable. This specific Foundations of Security: What Every Programmer Needs to Know (Expert's Voice) can give you a lot of buddies because by you looking at this one book you have matter that they don't and make you actually more like an interesting person. That book can be one of one step for you to get success. This guide offer you information that maybe your friend doesn't realize, by knowing more than different make you to be great people. So , why hesitate? We should have Foundations of Security: What Every Programmer Needs to Know (Expert's Voice).

Haydee Todd:

That book can make you to feel relax. That book Foundations of Security: What Every Programmer Needs to Know (Expert's Voice) was colourful and of course has pictures on there. As we know that book Foundations of Security: What Every Programmer Needs to Know (Expert's Voice) has many kinds or style. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think you are the character on there. Therefore not at all of book are generally make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading this.
