Staghorn Corals of the World [OP]: A Revision of the Genus Acropora By Carden Wallace

Staghorn corals (genus Acropora) are the most obvious and important corals on coral reefs throughout the world, providing much of the beauty and variety seen on the reefs.

This invaluable reference tool is the first major review of Acropora in over 100 years. It assesses all the known species worldwide, describing each in detail and illustrating the range of variability of form with habitat and geographic location. The classification, evolution and worldwide distribution of all species are reviewed and illustrated with colour plates, full page black and white plates and distribution maps. Details of the general biology of staghorn corals are discussed and illustrated.

The book is complemented by a CD-ROM, Staghorn Corals of the World: A Key to Species of Acropora, containing a LucID-based key to all species of Acropora and a photo library of type specimens from museums around the world.

Special Offer:
Staghorn Corals of the World book and CD-ROM set for only $220.00.

Editorial Review

Review
"This is an outstanding and vital piece of work, the culmination of the author's lifetime research on this difficult but fundamentally important genus."

(Rosen *Natural History Museum-London*)

"One's initial impression of Wallace's work is one of exceptional aesthetic quality. . .the quantity of information provided is remarkable and is obviously the culmination of many years of painstaking research. . .an invaluable resource for anyone working with Staghorn corals or with Scleractinian systematics. A wonderful addition to any library."

(Brooke *Oceanographic Institution*)

"This book, which reflects the lifelong research work of the author, sets a new standard in the study of the Acropora. In marine biology such a work has quite an historical meaning, and in the Aquarium world it will help to place the knowledge of the hobbyists on a more scientifically founded base. This book should not under any circumstance be missing from the bookshelves of reef aquarium enthusiasts, who have a strong interest in staghorn corals." (Knop *Koralle*)
