The Lancet Handbook of Treatment in Neurology, 1e (The Lancet Handbooks) By Charles P. Warlow BA MB BChir MD FRCP

This is not a book on how to make a diagnosis, but rather starts from the point of diagnosis and covers all the main neurological conditions as such as stroke, Parkinson's disease, epilepsy and migraine well as some of the rarer conditions such as Wilson's disease showing which treatments are evidence-based but also describing those which at present need more trials. Each condition is described in the following way: definition, cause, frequency, and prognosis. Written by expert contributors, this book describes the treatment that neurologists are responsible for, indicates when to refer, shows complications of treatment, as well as drug interactions.

- A quick-reference pocket guide
- Evidence-based treatment described
- Adverse effects of treatment mentioned along with their likelihood
- Advice given on when to refer
- Drug treatments interactions, costs, dosages are covered extensively

Editorial Review

Review
"This book covers all common general neurology well and the rarities briefly, but as such is an invaluable tool when deciding upon treatment of a condition which you have never seen before. It is inevitable in a handbook that content will be abbreviated; however, I think that this book is a successful balance of brevity and information." -- *Journal Neuromuscular Disorders*

About the Author
By Charles P. Warlow, BA, MB, BChir, MD, FRCP, Professor of Medical Neurology, Department of Clinical Neurosciences, Western General Hospital, Edinburgh, UK

Users Review

From reader reviews:

Wanda Woods:

Now a day those who Living in the era everywhere everything reachable by interact with the internet and the resources inside it can be true or not involve people to be aware of each facts they get.
