Critical Terrorism Studies: A New Research Agenda (Routledge Critical Terrorism Studies) From Routledge

In response to the growth of a critical perspective on contemporary issues of terrorism, this edited volume brings together a number of leading scholars to debate the new subfield of 'critical terrorism studies'.

In the years since the 9/11 attacks, terrorism studies has undergone a major transformation from minor subfield of security studies into a large stand-alone field, and is probably one of the fastest expanding areas of research in the Western academic world. However, much of the literature is beset by a number of problems, limiting its potential for producing rigorous empirical findings and genuine theoretical advancement. In response to these weaknesses in the broader field, a small but increasing number of scholars have begun to articulate a critical perspective on contemporary issues of terrorism. This volume brings together a number of leading scholars to debate the need for and the shape of this exciting new subfield.The first part of the volume examines some of the main shortcomings and limitations of orthodox terrorism studies, while the second examines exactly what a 'critical' terrorism studies would look like. Contributors from a variety of methodological and disciplinary perspectives give this volume diversity, and it will lay the foundations for, and provoke debate about, the future research agenda of this new field.

This book will be of much interest to students of critical security studies, terrorism studies and IR theory in general.

Editorial Review

Review

'Starting from a caustic, but well-founded, assessment of the serious limits of mainstream approaches to terrorism, the many interesting contributions in this precious volume convincingly argue why and how critical thinking can contribute to the understanding of political violence.'
Donatella Della Porta, European University Institute , Italy
