Mechanical Engineering Systems (IIE Core Textbooks Series) By Richard Gentle, Peter Edwards, William Bolton

The authors of *Mechanical Engineering Systems* have taken a highly practical approach within this book, bringing the subject to life through a lively text supported by numerous activities and case studies. Little prior knowledge of mathematics is assumed and so key numerical and statistical techniques are introduced through unique Maths in Action features.

The IIE Textbook Series from Butterworth-Heinemann

- Student-focused textbooks with numerous examples, activities, problems and knowledge-check questions
- Designed for a wide range of undergraduate courses
- Real-world engineering examples at the heart of each book
- Contextual introduction of key mathematical methods through Maths in Action features
- Core texts suitable for students with no previous background studying engineering

"I am very proud to be able to introduce this series as the fruition of a joint publishing venture between Butterworth-Heinemann and the Institution of Incorporated Engineers. Mechanical Engineering Systems is one of the first three titles in a series of core texts designed to cover the essential modules of a broad cross-section of undergraduate programmes in engineering and technology. These books are designed with today's students firmly in mind, and real-world engineering contexts to the fore - students who are increasingly opting for the growing number of courses that provide the foundation for Incorporated Engineer registration." **--Peter F Wason BSc(Eng) CEng FIEE FIIE FIMechE FIMgt. Secretary and Chief Executive,IIE**

This essential text is part of the IIE accredited textbook series from Newnes - textbooks to form the strong practical, business and academic foundations for the professional development of tomorrow's incorporated engineers.

Forthcoming lecturer support materials and the IIE textbook series website will provide additional material for handouts and assessment, plus the latest web links to support, and update case studies in the book.

- Content matched to requirements of IIE and other BSc Engineering and Technology courses
- Practical text featuring worked examples, case studies, assignments and knowledge-check questions throughout.
- Maths in Action panels introduce key mathematical methods in their engineering contexts

Editorial Review

Review
"Good coverage of 1st year engineering modules. Practical and usable for students. Not overloaded with maths." **--J. Lange, Lecturer, University of Central Lancashire**

From the Publisher
This essential text is part of the IIE accredited textbook series from Newnes – textbooks to form the strong practical, business and academic foundations for the professional development of tomorrow's incorporated engineers.Forthcoming lecturer support materials and the IIE textbook series website will provide additional material for handouts and assessment, plus the latest web links to support, and update case studies in the book.

About the Author
Former Lecturer at Buckingham Chilterns University College, High Wycombe, UK, and now retired, William Bolton has worked in industry and academia as a senior lecturer in a college of technology, a member of the Nuffield Advanced Physics team, an adviser to a British government aid project in Brazil on technical education, as a UNESCO consultant in Argentina and Thailand, and as Head of Research and Development at the Business and Technician Education Council. He has written many engineering textbooks, including Mechatronics, 4th ed., Engineering Science, 5th ed., Higher Engineering Science, 2nd ed., Mechanical Science, 3rd ed., and Instrumentation and Control Systems.

Users Review

From reader reviews:

Jena Alvarez:

What do you concentrate on book? It is just for students because they are still students or the idea for all people in the world, the actual best subject for that? Simply you can be answered for that concern above. Every person has various personality and hobby for every other. Don't to be forced someone or something that they don't need do that. You must know how great as well as important the book Mechanical Engineering Systems (IIE Core Textbooks Series). All type of book is it possible to see on many options. You can look for the internet sources or other social media.

Todd Quesinberry:

Do you certainly one of people who can't read satisfying if the sentence chained from the straightway, hold on guys this particular aren't like that. This Mechanical Engineering Systems (IIE Core Textbooks Series) book is readable simply by you who hate those perfect word style. You will find the info here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to give to you. The writer regarding Mechanical Engineering Systems (IIE Core Textbooks Series) content conveys objective easily to understand by lots of people. The printed and e-book are not different in the information but it just different such as it. So , do you still thinking Mechanical Engineering Systems (IIE Core Textbooks Series) is not loveable to be your top collection reading book?

Carl Adams:

Information is provisions for anyone to get better life, information currently can get by anyone from everywhere. The information can be a understanding or any news even restricted. What people must be consider when those information which is within the former life are hard to be find than now could be taking seriously which one works to believe or which one the resource are convinced. If you find the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Mechanical Engineering Systems (IIE Core Textbooks Series) as the daily resource information.

Hubert Macarthur:

Many people said that they feel weary when they reading a publication. They are directly felt the item when they get a half elements of the book. You can choose typically the book Mechanical Engineering Systems (IIE Core Textbooks Series) to make your own reading is interesting. Your own skill of reading expertise is developing when you including reading. Try to choose basic book to make you enjoy to learn it and mingle the opinion about book and looking at especially. It is to be initially opinion for you to like to wide open a book and examine it. Beside that the book Mechanical Engineering Systems (IIE Core Textbooks Series) can to be your friend when you're sense alone and confuse with the information must you're doing of the time.
